Update for Simplex FQQ Tool
Feature Quick Quote Takeoff, Point to Point
Circuit Designers and Battery Calculation Tool

We are pleased to announce the following updates to the FQQ Tool in version 1-6-3-7.

FQQ is designed to provide users with an offline enhanced workflow experience facilitating rapid project takeoffs and circuit designs. It utilizes spreadsheet functionality for interface with the **Solution Navigator** pricing platform. The **IDNAC, NAC, and MX Loop Point to Point Designers** support multiple circuits in a single calculation. **FQQ** includes the ability to create a complete industry standard **Battery Calculation** including panel components and field devices.

IDNet TrueAlarm Multi Sensor:
The TrueAlarm Multi Sensor 4098-9754 referenced in the IDNet, Quick Picks, File Import and Battery Calculation Sheets has been updated to the new replacement Model 4098-9764 which is UL Listed to Standard 268 7th Edition.

File Import Enhancements:
The file import feature has been updated to automatically detect an import file with a column named "Count". If this column is detected, it will prompt the user to choose if they wish this column to be used for the imported quantities into the respective groups.
